

Jonathan V. O'Steen, Esq. - State Bar #024043 O'STEEN & HARRISON, PLC 300 W. Clarendon Ave., Suite 400 Phoenix, Arizona 85013-3424 (602) 252-8888 (602) 274-1209 FAX iosteen@vanosteen.com 5 William D. Marler, Esq. – WSBA #17233 (*Pro Hac Vice* Pending) MARLER CLARK, L.L.P., P.S. 1301 Second Ave., Suite 2800 Seattle, Washington 98101 (206) 346-1876 (206) 346-1898 FAX bmarler@marlerclark.com 10 **Attorneys for Plaintiff** 11 12 IN THE UNITED STATES DISTRICT COURT 13 IN AND FOR THE DISTRICT OF ARIZONA 14 Elisabeth Barber, NO. 15 Plaintiff, 16 **COMPLAINT** 17 ٧. 18 Andrew and Williamson Sales, Co., a **DEMAND FOR JURY TRIAL** 19 California corporation, 20 Defendant. 21 22 Plaintiff, by and through undersigned counsel, and for her claims against the 23 Defendant, alleges as follows: 24 **PARTIES** 25 1. Plaintiff Elisabeth Barber resides in Maricopa County, Arizona. 26 27

2. Defendant Andrew and Williamson Sales, Co. is a corporation organized and existing under the laws of California and conducts business throughout the United States, including the State of Arizona. Its principal place of business is in San Diego, California. Andrew and Williamson Sales, Co. imports, manufactures, distributes, and sells a variety of fresh produce products, including cucumbers. Andrew and Williamson Sales, Co. imported, manufactured, distributed, and sold the cucumbers that the Centers for Disease Control and Prevention has determined to be the cause of an outbreak of at least 418 Salmonella Poona illnesses in 31 states, including 72 illnesses and a death in the state of Arizona alone. Andrew and Williamson Sales, Co.'s cucumbers caused the Salmonella Poona illnesses suffered by Plaintiff Elisabeth Barber, as set forth in more detail below.

JURISDICTION AND VENUE

- 3. This Court has jurisdiction over this matter pursuant to 28 U.S.C. § 1332. The amount in controversy exceeds \$75,000 exclusive of interests and costs, and this is an action by an individual plaintiff against a Defendant with its principal place of business in another state.
- 4. Venue in this judicial district is proper pursuant to 28 U.S.C. § 1391(a)(2) because a substantial part of the events or omissions giving rise to the claim occurred in this judicial district and because the Defendant was subject to personal jurisdiction in this judicial district at the time of the commencement of the action.

7 8

Barber v. Andrew and Williamson

The Salmonella Poona Outbreak

- 5. The CDC, multiple states, and the U.S. Food and Drug Administration (FDA) are investigating a multistate outbreak of *Salmonella* Poona infections linked to imported cucumbers grown and packed by Rancho Don Juanito in Mexico and distributed by Andrew & Williamson Sales, Co.
- 6. Public health investigators are using the PulseNet system to identify illnesses that may be part of this outbreak. CDC coordinates PulseNet, the national subtyping network of public health and food regulatory agency laboratories. DNA "fingerprinting" is performed on Salmonella bacteria isolated from ill people by using a technique called pulsed-field gel electrophoresis, or PFGE. PulseNet manages a national database of these DNA "fingerprints" to identify possible outbreaks. Three DNA "fingerprints" (outbreak strains) are included in this investigation.
- 7. As of September 15, 2015, a total of 418 people infected with the outbreak strains of *Salmonella* Poona have been reported from 31 states. The number of ill people reported from each state is as follows: Alaska (10), Arizona (72), Arkansas (6), California (89), Colorado (16), Hawaii (1), Idaho (14), Illinois (6), Indiana (2), Kansas (1), Kentucky (1), Louisiana (4), Minnesota (20), Missouri (8), Montana (13), Nebraska (2), Nevada (9), New Mexico (22), New York (4), North Dakota (2), Ohio (2), Oklahoma (10), Oregon (8), Pennsylvania (2), South Carolina (8), Texas (20), Utah (37), Virginia (1), Washington (15), Wisconsin (9), and Wyoming (4).

- 8. Among people for whom information is available, illnesses started on dates ranging from July 3, 2015 to September 3, 2015. Ill people range in age from less than 1 year to 99, with a median age of 17. Fifty-two percent of ill people are children younger than 18 years. Fifty-three percent of ill people are female. Among 290 people with available information, 91 (31%) report being hospitalized. Two deaths have been reported from California (1) and Texas (1).
- Epidemiologic, laboratory, and traceback investigations have identified imported cucumbers from Mexico and distributed by Andrew & Williamson Sales, Co. as a likely source of the infections in this outbreak.
- 10. On September 4, 2015, Andrew & Williamson Sales, Co. voluntarily recalled all cucumbers sold under the "Limited Edition" brand label during the period from August 1, 2015 through September 3, 2015 because they may be contaminated with Salmonella. The type of cucumber is often referred to as a "slicer" or "American" cucumber. It is dark green in color and typical length is 7 to 10 inches. In retail locations it is typically sold in a bulk display without any individual packaging or plastic wrapping. Limited Edition cucumbers were distributed in the states of Alaska, Arizona, Arkansas, California, Colorado, Florida, Idaho, Illinois, Kansas, Kentucky, Louisiana, Minnesota, Mississippi, Montana, Nevada, New Jersey, New Mexico, Oklahoma, Oregon, South Carolina, Texas, and Utah and reached customers through retail, food service companies, wholesalers, and brokers. Further distribution to other states may

Prior Cucumber Salmonella Outbreaks

- 11. In 2014 a total of 275 cases were reported from 29 states and the District of Columbia linked to cucumbers grown in the Delmarva region on Maryland. Illness onset dates ranged from May 25 to September 29, 2014. Median age of patients was 42 years (range = <1–90 years); 66% (174 of 265) were female. Thirty-four percent (48 of 141) were hospitalized; one death was reported in an elderly man with bacteremia.
- 12. In 2013 the CDC collaborated with public health officials in many states and the U.S. Food and Drug Administration (FDA) to investigate a multistate outbreak of Salmonella Saintpaul infections linked to imported cucumbers supplied by Daniel Cardenas Izabal and Miracle Greenhouse of Culiacán, Mexico and distributed by Tricar Sales, Inc. of Rio Rico, Arizona. A total of 84 persons infected with the outbreak strain of Salmonella Saintpaul were reported from 18 states. The number of ill persons identified in each state was as follows: Arizona (11), California (29), Colorado (2), Idaho (2), Illinois (3), Louisiana (1), Maryland (1), Massachusetts (1), Minnesota (9), Nevada (1), New Mexico (2), North Carolina (3), Ohio (3), Oregon (2), South Dakota (2), Texas (7), Virginia (3), and Wisconsin (2). Among persons for whom information was available, illness onset dates ranged from January 12, 2013 to April 28, 2013. Ill persons ranged in age from less than 1 year to 89 years, with a median age of 27 years. Sixty-two percent of ill persons were female. Among 60 persons with available information, 17 (28%) were hospitalized. No

deaths were reported.

Salmonella

- 13. The term Salmonella refers to a group or family of bacteria that variously cause illness in humans. The taxonomy and nomenclature of Salmonella have changed over the years and are still evolving. Currently, the Centers for Disease Control and Prevention (CDC) recognizes two species, which are divided into seven subspecies. These subspecies are divided into over 50 serogroups based on somatic (O) antigens present. The most common Salmonella serogroups are A, B, C, D, E, F, and G. Serogroups are further divided into over 2,500 serotypes. Salmonella serotypes are typically identified through a series of tests of antigenic formulas listed in a document called the Kauffmann-White Scheme published by the World Health Organization Collaborating Centre for Reference and Research on Salmonella.
- 14. Salmonella is an enteric bacterium, which means that it lives in the intestinal tracts of humans and other animals, including birds. Salmonella bacteria are usually transmitted to humans by eating foods contaminated with animal feces or foods that have been handled by infected food service workers who have practiced poor personal hygiene. Contaminated foods usually look and smell normal. Contaminated foods are often of animal origin, such as beef, poultry, milk, or eggs, but all foods, including vegetables, may become contaminated. Many raw foods of animal origin are frequently contaminated, but thorough cooking kills Salmonella.

- 15. The term reactive arthritis refers to an inflammation of one or more joints, following an infection localized at another site distant from the affected joints. The predominant site of the infection is the gastrointestinal tract. Several bacteria, including *Salmonella*, induce septic arthritis. The resulting joint pain and inflammation can resolve completely over time or permanent joint damage can occur.
- 16. The reactive arthritis associated with Reiter's may develop after a person eats food that has been tainted with bacteria. In a small number of persons, the joint inflammation is accompanied by conjunctivitis (inflammation of the eyes), and uveitis (painful urination). *Id.* This triad of symptoms is called Reiter's Syndrome. Reiter's syndrome, a form of reactive arthritis, is an uncommon but debilitating syndrome caused by gastrointestinal or genitourinary infections. The most common gastrointestinal bacteria involved are *Salmonella*, *Campylobacter*, *Yersinia*, and *Shigella*. A triad of arthritis, conjunctivitis, and urethritis characterizes Reiter's syndrome, although not all three symptoms occur in all affected individuals.
- 17. Salmonella is also a cause of a condition called post infectious irritable bowel syndrome (IBS), which is a chronic disorder characterized by alternating bouts of constipation and diarrhea, both of which are generally accompanied by abdominal cramping and pain. In one recent study, over one-third of IBS sufferers had had IBS for more than ten years, with their symptoms remaining fairly constant over time. IBS sufferers typically experienced symptoms for an

Elisabeth Barber's Salmonella Illness

- 18. Elisabeth Barber is a 46-year-old resident of Mesa, Arizona. On August 7, 2015, she purchased raw cucumbers from a Fry's Food Stores grocery store in Mesa. Later that same day, she prepared the cucumbers raw for a California roll that she did not share with anyone else.
- 19. The next morning, Saturday, August 8, 2015, Ms. Barber was awakened with terrible stomach cramps, which was soon followed by the onset of diarrhea. Ms. Barber suffered from episodes of explosive, painful diarrhea almost hourly over the next few days. During that time, she also suffered from night sweats, headaches, and shaking chills and fevers.
- 20. By Tuesday, August 10, 2015, Ms. Barber realized that her illness not susceptible to at-home treatment. She presented to FastMed Urgent care, where her temperature was measured at 102°F. After an initial assessment and urinalysis, the urgent care doctor told her she was too sick for them to care for her, and she was told to go to the ER.
- 21. Ms. Barber left the urgent care office and drove herself to Mountain Vista Medical Center in Mesa, Arizona. In the emergency room, she was given two (2) liters of IV fluids and IV antibiotics. She also gave a stool sample in the emergency room and had blood work done. After a few hours of observation, she was stable enough to be discharged home to continue her convalescence on her own, and she was given a prescription for ten days of Ciprofloxacin.
- 22. Ms. Barber continued to have stomach cramps and diarrhea, along with terrible headaches, for the next 3–4 weeks. The emergency room doctor Complaint Page 8

gave her a note to be off work, but she went back to work on August 13, 2015 despite the fact that she continued to suffer from difficult gastrointestinal symptoms. She was unable to take more time because she had run out of sick leave and had no available vacation time.

23. About two days after Ms. Barber's emergency room visit, the hospital called her to tell her that her stool sample had tested positive for *Salmonella*. The health department called her a couple of weeks later to ask her questions about what she ate and where, informing her she was part of a larger *Salmonella* Poona outbreak linked to cucumbers.

CAUSES OF ACTION

COUNT ONE STRICT PRODUCTS LIABILITY

- 24. Plaintiff incorporates herein by reference the allegations in paragraphs 1–23.
- 25. The defendant was at all times relevant hereto the manufacturer and seller of the adulterated food product that is the subject of the action.
- 26. The adulterated food product that the defendant manufactured, distributed, and/or sold was, at the time it left the defendant's control, defective and unreasonably dangerous for its ordinary and expected use because it contained *Salmonella*, a deadly pathogen.
- 27. The adulterated food product that the defendant manufactured, distributed, and/or sold was delivered to the plaintiff without any change in its defective condition. The adulterated food product that the defendant manufactured,

- distributed, and/or sold was used in the manner expected and intended, and was consumed by the plaintiff.
- 28. The defendant owed a duty of care to the plaintiff to design, manufacture, and/or sell food that was not adulterated, which was fit for human consumption, that was reasonably safe in construction, and that was free of pathogenic bacteria or other substances injurious to human health. The defendant breached this duty.
- 29. The defendant owned a duty of care to the plaintiff to design, prepare, serve, and sell food that was fit for human consumption, and that was safe to the extent contemplated by a reasonable consumer. The defendant breached this duty.
- 30. The plaintiff suffered injury and damages as a direct and proximate result of the defective and unreasonably dangerous condition of the adulterated food product that the defendant manufactured, distributed, and/or sold.

COUNT TWO NEGLIGENCE

- 31. Plaintiff incorporates herein by reference the allegations in paragraphs 1–30.
- 32. The defendant owed to the plaintiff a duty to use reasonable care in the manufacture, distribution, and sale of its food product, the breach of which duty would have prevented or eliminated the risk that the defendant's food products would become contaminated with *Salmonella* or any other dangerous pathogen. The defendant breached this duty.

- 33. The defendant had a duty to comply with all statutes, laws, regulations, or safety codes pertaining to the manufacture, distribution, storage, and sale of its food product, but failed to do so, and was therefore negligent. The plaintiff is among the class of persons designed to be protected by these statutes, laws, regulations, safety codes or provision pertaining to the manufacture, distribution, storage, and sale of similar food products.
 34. The defendant had a duty to properly supervise, train, and monitor its
- 34. The defendant had a duty to properly supervise, train, and monitor its respective employees, and to ensure their compliance with all applicable statutes, laws, regulations, or safety codes pertaining to the manufacture, distribution, storage, and sale of similar food products, but it failed to do so, and was therefore negligent.
- 35. The defendant had a duty to use ingredients, supplies, and other constituent materials that were reasonably safe, wholesome, free of defects, and that otherwise complied with applicable federal, state, and local laws, ordinances and regulations, and that were clean, free from adulteration, and safe for human consumption, but it failed to do so, and was therefore negligent.
- 36. As a direct and proximate result of the defendant's acts of negligence, the plaintiff sustained injuries and damages in an amount to be determined at trial.

COUNT THREE NEGLIGENCE PER SE

37. Plaintiff incorporates herein by reference the allegations in paragraphs 1–36.

- 38. The defendant had a duty to comply with all applicable state and federal regulations intended to ensure the purity and safety of its food product, including the requirements of the Federal Food, Drug and Cosmetics Act (21 U.S.C. § 301 *et seq.*), and the Arizona adulterated food statutes (A.R.S. § 36-901 *et seq.*).
- 39. The defendant failed to comply with the provisions of the health and safety acts identified above, and, as a result, was negligent *per se* in its manufacture, distribution, and sale of food adulterated with *Salmonella*, a deadly pathogen.
- 40. As a direct and proximate result of conduct by the defendant that was negligent *per se*, the plaintiff sustained injury and damages in an amount to be determined at trial.

DAMAGES

41. Plaintiff has suffered general, special, incidental, and consequential damages as the direct and proximate result of the acts and omissions of the defendant, in an amount that shall be fully proven at the time of trial. These damages include, but are not limited to: damages for general pain and suffering; damages for loss of enjoyment of life, both past and future; medical and medical related expenses, both past and future; travel and travel-related future; emotional distress, future: expenses, past and past and pharmaceutical expenses, past and future; and all other ordinary, incidental, or consequential damages that would or could be reasonably anticipated to

27

28

PRAYER FOR RELIEF

WHEREFORE, Plaintiff prays for the following relief:

- That the Court award Plaintiff judgment against Defendant, in such sums as shall be determined to fully and fairly compensate the Plaintiff for all general, special, incidental and consequential damages incurred, or to be incurred, as the direct and proximate result of the acts and omissions of Defendant, in an amount to be proven at trial.
- 2. That the Court award Plaintiff her costs, disbursements and reasonable attorneys' fees incurred.
- 3. That the Court award such other and further relief as it deems necessary and proper in the circumstances.

JURY DEMAND

Plaintiff demands a trial by jury on all issues so triable with the maximum number of jurors permitted by law.

RESPECTFULLY SUBMITTED this 20th day of September 2015.
